

# **OVERHEAD LINE STEELWORK**

Galvanized Forgings, Pressings, Castings & Fabrications

**Established in 1875, B.B. Price Limited is a family owned and managed manufacturing company based in the West Midlands.**

With over 70 years of experience in the manufacture and supply of Overhead Line products to the Electrical and Power Transmission Industry, we are specialists in the market and have established a strong reputation for our product quality and exceptional service.

Operating from our three manufacturing sites, we supply both the domestic and overseas markets with quality forged, pressed and fabricated products. Through continual investment in the latest technology and process improvements, our in-house capabilities include:

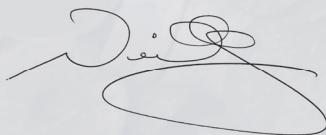

- Galvanizing
- Fabrication
- Forging
- Threading
- Presswork
- CNC Turning
- Laser Cutting
- CNC Punching & Drilling
- Shot Blasting
- Testing

This comprehensive list of capabilities gives us full control over the manufacturing processes. Our product quality systems are also accredited to ISO9001, ISO14001, EN1090 (Execution Class 2), Achilles UVDB and RISQS to give you added peace of mind that your products are manufactured to the highest standards.

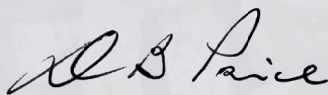

Having our own storage site gives us the ability to stock substantial quantities of standard and non-standard items. This facilitates us to respond quickly to customers' urgent requirements and fulfil orders with short lead times to further enhance customer satisfaction.

Now in our fifth generation, we remain as committed as ever to the core values of quality and customer service that have earned us our position as a market leader as we continually strive to develop customer relationships at home and abroad.

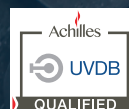

We look forward to working with you soon.

**INSULATOR BRACKET**

**RAISED SUPPORT BRACKET**

**INSULATOR PIN**

**PILOT INSULATOR PIN**

**INSULATOR PLATE**

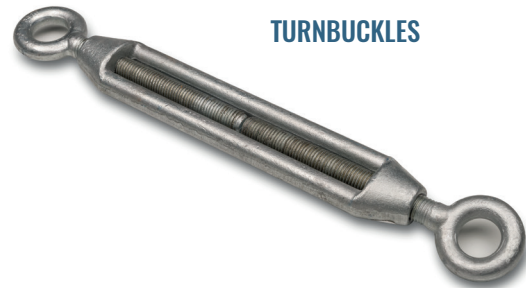

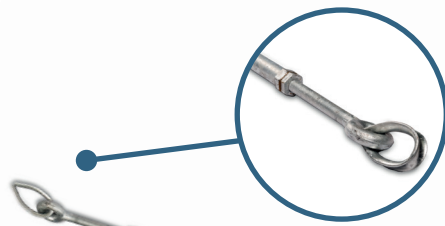

## INSULATORS

We offer a wide variety of insulator pins and brackets to BS 3288 and ENATS 4395 specifications as well as bespoke designs.

**INSULATOR HOOK**

## STAY EQUIPMENT

TURNBUCKLES

STAY ROD

STAY OUTRIGGER BRACKET

We offer a complete range of stay rods and accessories to ENATS 4391 and customers dedicated specifications.

## SCREW ANCHORS

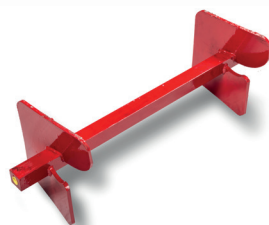

ROCK STAY ROD

HELIX ANCHOR ROD

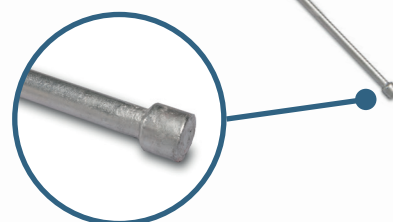

SCREW ANCHORS

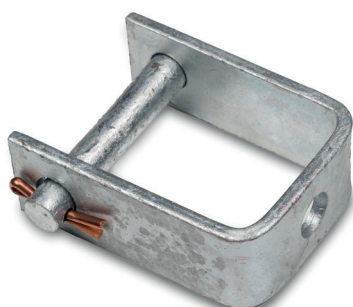

HELIX ANCHORS

We offer a full range of helix type screw anchors and rock anchors together with all of the necessary accessories such as anchor rods and turnbuckles.

**D IRON BRACKET**

**CRUCIFIX BRACKET**

**U BOLT CONCENTRIC BRACKET**

**UNDER EAVES EXTENSION BRACKET**

**OUTRIGGER BRACKET**

**LV OUTRIGGER BRACKET**

**EAVES EXTENSION BRACKET**

### BRACKETS

We offer many different types of standard brackets to ENATS 4395 designs as well as many designs to customer specifications. Our comprehensive range of plant and equipment allow us to produce the entire range for steelwork and accessories for the electricity distribution network.

We also manufacture an extensive range of brackets to complete the range of accessories for overhead power lines.

## CROSS ARMS

**BOAT CROSS ARM**

We offer a wide range of standard and non-standard cross arm designs suitable for 11kv up to 132kv distribution lines.

**FUSE ANGLE CROSS ARM**

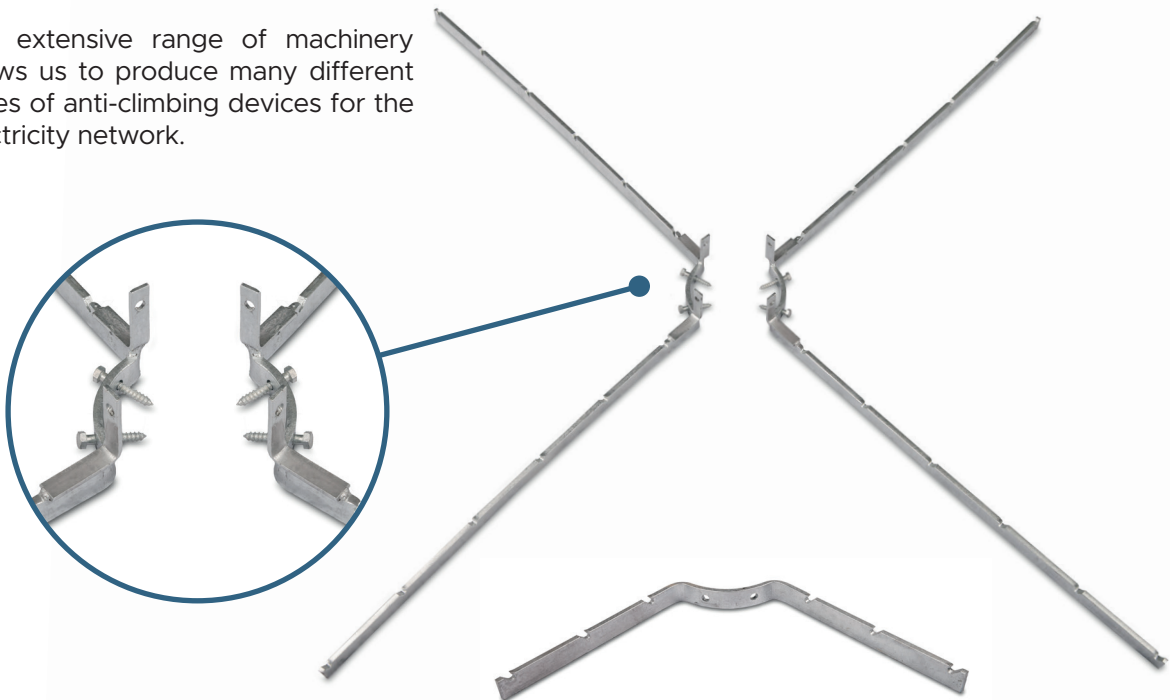

**CROSS ARM**

## ANTI-CLIMBING GUARDS

Our extensive range of machinery allows us to produce many different types of anti-climbing devices for the electricity network.

**HEAVY DUTY HOOK**

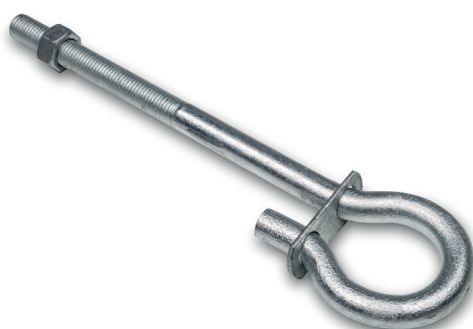

**BALL END HOOK**

**ABC HOOK BOLT**

**OUTRIGGER HOOK**

**HOOK BOLT WITH KEEPER PLATE**

## HOOKS

We offer a full range of ball ended hooks and fittings as featured in BS 3288. We also offer a wide range of ABC fittings to ENATS 4314, as well as fittings to customer specifications.

## EYENUTS & EYEBOLTS

### EYEBOLTS

We have an extensive range of upset forging screw press machines which give us the capacity to offer bespoke forgings to customers specifications.

### PALM EYEBOLT

We produce a range of Eyebolts, Eyenuts and Eyelinks to specifications such as BS 3288 and ENATS 4396.

### EYENUTS

### BALL ENDED EYELINKS

## POLE TOP EXTENSIONS

We have recently started to produce our own bespoke pole top extension brackets.

## PLATES

**TIE STRAP**

**TWISTED TIE STRAP**

**ANGLE STRUT**

**CLAMPING PLATE**

**SECTION PLATE**

**TERMINAL PLATE**

We offer many different bracket plates and struts for use on overhead power lines. We produce the entire range of brackets detailed in ENATS 4395 specification along with an extensive range of customer designs.

Our wide range of press machines, together with in-house laser cutting, gives us the capacity to produce light pressings from 2mm in thickness up to heavy plates and brackets which can be 25mm in thickness.

## SOCKETS

We offer an extensive range of sockets and fittings as detailed in BS 3288 specification with ratings from 40kn up to 190kn.

**LARGE SOCKET THIMBLE**

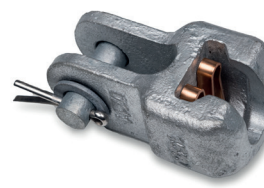

**SMALL SOCKET THIMBLE**

**EXTENDED SOCKET CLEVIS**

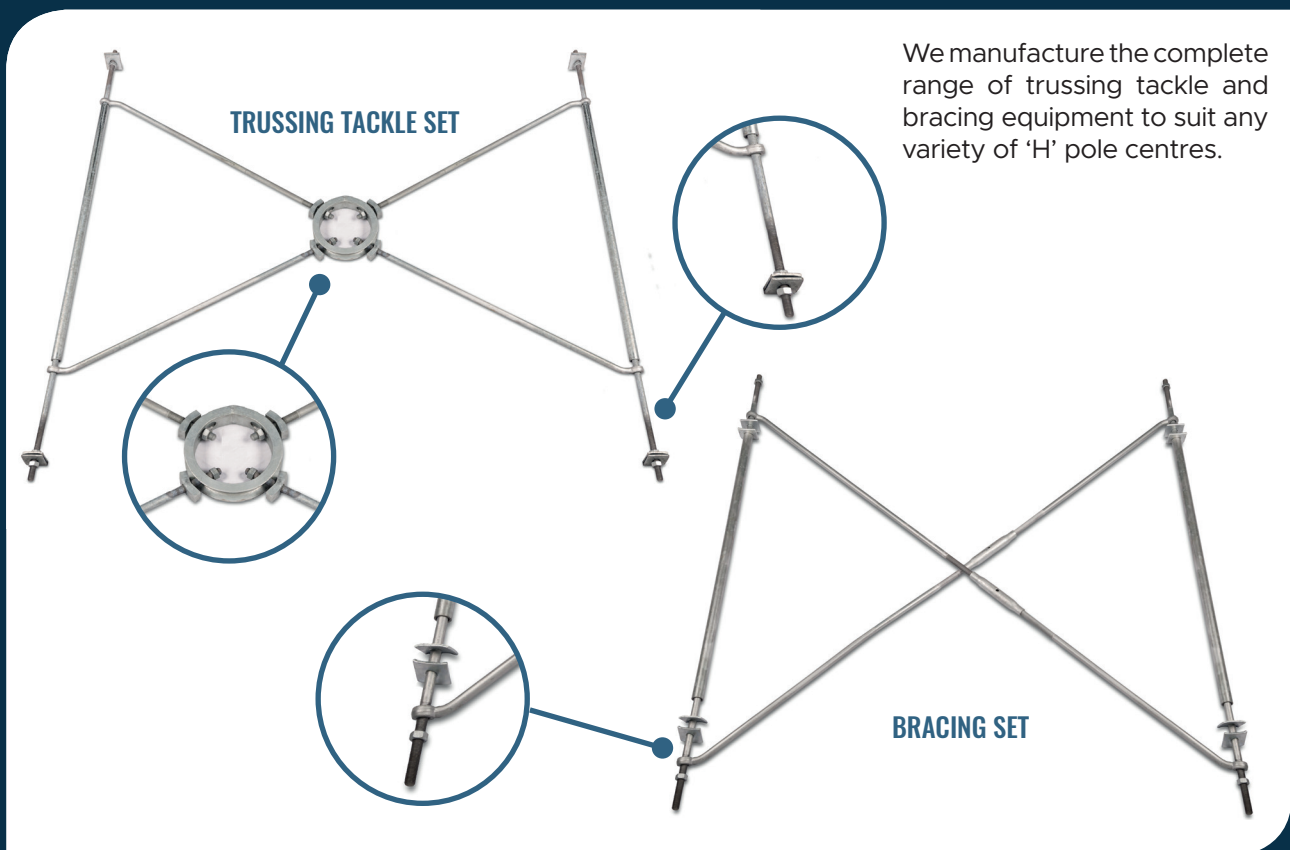

**SOCKET TONGUE**

**SOCKET CLEVIS**

## TRUSSING TACKLE & BRACING SETS

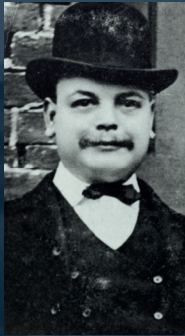

## TRANSFORMER PLATFORM SETS

# FORGING AHEAD SINCE 1875

B.B. Price Limited was founded in 1875 by Joseph Price (the great grandfather of the current directors), in the trade of nail making, operating a simple forge in an outhouse at the family home. During the 1940s, the business diversified into forging specialized galvanized steelwork for the overhead line electricity and telecommunications industries which still represents the bulk of the company's production to this day.

1875

Joseph Price establishes his nail and spike business 'Joseph Price and Sons' from his home on the Hagley Road in Halesowen.

1914-18

Production remains largely unaffected despite the First World War. The company enrolls with Britain Disabled Mens' Working Scheme and is proud to employ disabled service men.

1942

Jeffrey Price survives being taken a prisoner of war in Singapore for three and a half years, ironically being forced to lay down track spikes that had been made and supplied by B.B. Price prior to the war.

1950

The entire Hagley Road site is redeveloped as a factory and offices as the company finds new direction becoming an important supplier to the overhead power transmission, civil engineering, railway and mining industries.

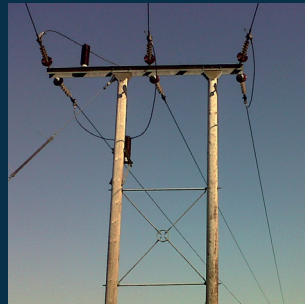

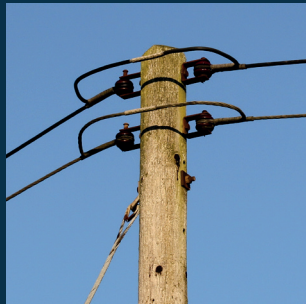

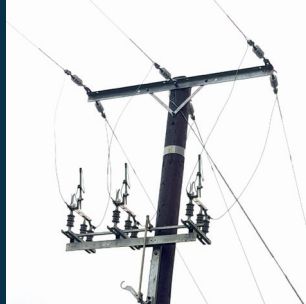

1999

B. Birks & Company Limited is acquired and the company's head office is relocated to their Newtown Street site in Cradley Heath.

2018

Warehousing space is significantly increased with the purchase of Unit 1, Corngreaves Road, Cradley Heath providing an additional 48,400 sq. ft. of space.

Unit 1 City Estate, Corngreaves Road, Cradley Heath, West Midlands, B64 7EP
